

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A fungicidal mixture comprising, as active components,
1) the triazolopyrimidine derivative of the formula I

and

- 2) quinoxifen of the formula II

in a synergistically effective amount, wherein the weight ratio of the compound of formula I and the compound of formula II is from 50:1 to 1:10.

2. (Currently Amended) A fungicidal mixture comprising the compound of the formula I and the compound of the formula II in a weight ratio of from ~~100:1 to 1:100~~ 10:1 to 1:5.

3. (Previously Presented) A fungicidal composition comprising a liquid or solid carrier and a mixture as claimed in claim 1.

4. (Original) A method for controlling harmful fungi from the class of the *Oomycetes*, which comprises treating the fungi, their habitat or the seed, the soil or the plants to be protected against fungal attack with an effective amount of the compound I and the compound II as set forth in claim 1.

5. (Previously Presented) A method as claimed in claim 4, wherein the compounds I and II are applied simultaneously, that is jointly or separately, or in succession.

6. (Previously Presented) A method as claimed in claim 4, wherein the mixture is applied to the soil or the plants to be protected against fungal attack in an amount of from 5 g/ha to 2000 g/ha.

7. (Previously Presented) A method as claimed in claim 4, wherein the mixture is applied in an amount of from 1 to 1000 g/100 kg of seed.

8. (Previously Presented) A method as claimed in claim 4, wherein the harmful fungus *Plasmopara viticola* is controlled.

9. (Previously Presented) Seed comprising the mixture as claimed in claim 1 in an amount of from 1 to 1000 g/100 kg.

10. (Original) The use of the compound I and the compound II as set forth in claim 1 for preparing a composition suitable for controlling *Oomycetes*.

11. (Previously Presented) A fungicidal composition comprising a liquid or solid carrier and a mixture as claimed in claim 2.

12. (Previously Presented) A method wherein the compounds I and II as set forth in claim 1 are applied simultaneously, that is jointly or separately, or in succession.

13. (Previously Presented) A method wherein the mixture as claimed in claim 1 is applied to the soil or the plants to be protected against fungal attack in an amount of from 5 g/ha to 2000 g/ha.

14. (Previously Presented) A method wherein the mixture as claimed in claim 2 is applied to the soil or the plants to be protected against fungal attack in an amount of from 5 g/ha to 2000 g/ha.

15. (Previously Presented) A method as claimed in claim 5, wherein the mixture is applied in an amount of from 1 to 1000 g/100 kg of seed.

16. (Previously Presented) A method wherein the mixture as claimed in claim 1 is applied in an amount of from 1 to 1000 g/100 kg of seed.

17. (Previously Presented) A method wherein the mixture as claimed in claim 2 is applied in an amount of from 1 to 1000 g/100 kg of seed.

18. (Currently Amended) A method as claimed in claim 5, wherein the harmful fungus *Plasmopara viticola* is controlled.

19. (Previously Presented) A method as claimed in claim 6, wherein the harmful fungus *Plasmopara viticola* is controlled.

20. (Previously Presented) A method as claimed in claim 7, wherein the harmful fungus *Plasmopara viticola* is controlled.
